2050 SUPERCAB

OUR BIGGEST 6M BOAT EVER

The 2050 Supercab remains the bigger brother to the 1850 Supercab but now boasts an even longer cockpit and gunnel length than it had before and is now accompanied by an extended roof aft for added protection and provision for 3-sided clears.

This is our biggest 6m boat yet. It's wider, longer, drier and delivers a massive interior volume where even the biggest statures will feel comfortable at the helm.

2050 SUPERCAB

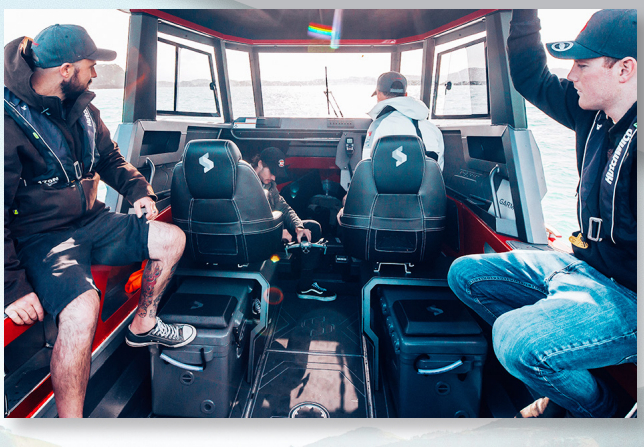

POWDER COATED ROD RACK

A new bolt-on rod rack powdercoated in Spica Pearl to match the cabin graces the back of the roof with 8 rodholder tubes. A revised handrail profile provides overhead handholds for various different statures and the lower portion on the outer edges assists with stepping up onto the coaming tops to walk around the cabin.

FLAT GLASS CABIN

A move away from traditional curved glass screen allowed the design team to dial up the aggression in the lines of the cabin to 11, now looking even more dynamic than it did before. A huge glazed area creates excellent forward visibility and a neat pocket in the lower edge of the windscreen provides the idea location for the windscreen wiper. Sliding windows port & starboard have been made standard across the board.

BLADE SEAT SUPPORTS

The new "Blade" seat support system is standard on all packages, doing away with cantilevers and rail seats and combining the benefits of both into one design. The new blades allow a 70L split lid cooler bin to slide all the way forward to make more cockpit space behind when fishing. They are powder coated in Spica Pearl to match the cabin.

SPECIFICATIONS

Hull Length	6.30m (20.7ft)
Beam Width	2.30m (90.6in)
Boat Height Min/Max	2.46m (96.9in)
Dry Hull Weight	1013kg (2233lb)
Maximum Persons	7
Maximum HP Limit	200hp
Min Recommended HP	150hp
Motor Leg Length	25in
Max Aux Motor HP	15hp
Internal Beam	1.72m (67.8in)
Internal Gunnel Height AFT	813mm (32.0in)
Outside Chine Width	2.05m (80.6in)
Deadrise AFT	16deg
Life Ring Thickness	3mm + 3mm (0.12in + 0.12in)
Hull Thickness	5mm (0.20in)
Fuel Tank Capacity	200L (53gal)
Total Sealed Chamber Volume	1726L (61.0ft3)
Life Ring Chamber Volume	1071L (37.8ft3)

- Wing style coamings
- 4x Stainless steel rod holders and 4x multi-holders in gunnel tops
- 200L EPA compliant underfloor fuel tank
- 2050 Supercab graphics kit

2050 SUPERCAB PACKAGES

ADVENTURE

The 2050 Supercab Adventure package is a very well-equipped starting package with a wide scope for upgrades. EVA foam is standard fitment on gunnel tops and transom steps, as is our proprietary Blade seat support system that allows for the accommodation of a 70L split lid cooler bin beneath the frame. The Adventure 2050 Supercab also comes with hydraulic steering and a windscreen wiper as well as dual frameless sliding windows port and starboard. The sense of volume inside is amazing and leaves you wondering how this hard top boat can be only 6m.

SPORTFISH

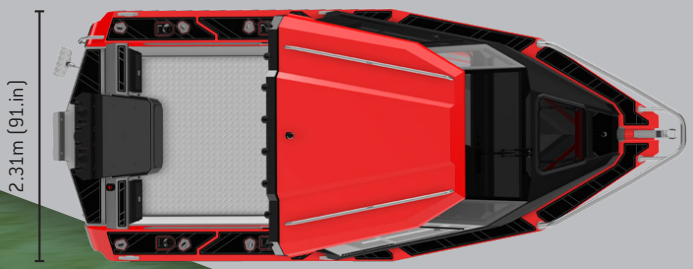

The 2050 Supercab Sportfish package raises the level of standard fitment by also including a raft of popular options that include stage-1 paint and ambient blue lighting for aesthetic appeal and a powder coated bait board and washdown pump to get you fishing. While EVA foam is standard fitment on coamings and topside surfaces, full EVA flooring remains an option. This package is made up of all the most popular options and caters for the buyer looking for a simple yet polished platform to enhance with further options and accessories.

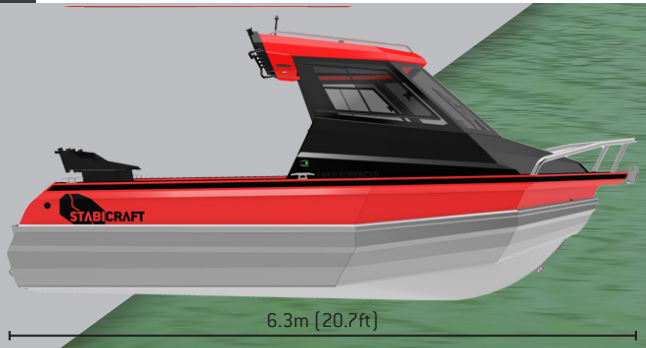

PROFISH

The Profish is the top tier package, and the appointment of features appeals to those who appreciate a higher level of comforts at sea. EVA foam covers the boat throughout including the inside surfaces of the cabin sides and across the floor. Two suspension units support the elite bolster seats while closed cell baffling silences the ride. The transom receives a top mounted Superfish live bait tank and a drum winch takes the mess and effort out of anchoring. To cap it all off, stage-2 paint extends down to the bottom of the life ring and every rail on board gets the powder coating treatment.
