

2350 SUPERCAB

YOUR SERIOUS 7M+ OFFSHORE PARTNER

The 2350 Supercab is a new 7m+ hull covered with Stabicraft's signature new-DNA cabin styling. After the long and successful tenure of the 2400 Supercab, Stabicraft challenged themselves to create a great offshore-performing hull, spacious deck and cabin, and a modern, modular feature set to exceed even the broadest range of customer expectations. A larger 400L fuel capacity, higher 350hp range, wider beam, bigger internal volume, innovative seating features, and competitive price point make the new Stabicraft 2350 Supercab an enticing prospect for boat owners.

2350 SUPERCAB

Off Shore Performance

NEW HULL DESIGN WITH FINER BOW ENTRY

The 2350 Supercab debuts a new hull, which has been subjected to extensive hydrodynamic and on-water testing. Stabicraft has increased the keel angle and tapered the forward sealed chambers upwards, giving a finer entry. This has allowed the hull to better navigate rough water by dispersing the water further back under the hull, allowing a very dry ride.

Deck and Cabin Space

INCREASED DECK AREA AND CABIN VOLUME

The 2350 Supercab maximises the beam up to the legal towing limits in all its major markets. In turn, the 2350 boasts an impressive increase in cabin volume from its predecessor, the 2400 Supercab. The 2350 Supercab comfortably fit 6 people within the cabin where the 2400 could only comfortably fit 2 people.

Cabin Fit and Finish

CONFIGURE YOUR CABIN TO SUIT YOUR BOATING

The 2350 Supercab is equipped with the largest range of modular interior options they have ever produced. With upgradeable features like cabin berths, fridges, pie warmers, toilets, suspension seating, and cooler boxes, you can configure your 2350 Supercab to best suit your style of boating.

SPECIFICATIONS

Hull Length	23.5ft (7.17m)

2350 SUPERCAB PACKAGES

ADVENTURE

The Adventure package comes with the essentials you need for boating but leaves the appointment of comfort features completely up to you so that you can include anything else you think you'd need. This entry-level package makes moving into a 7m+ boat a more realistic option for those looking to move up in size. As an unpainted base package, the Adventure represents excellent value for money. Still, it includes all the necessary features like dual wipers, a 2-step boarding ladder, fish deck lighting, bow rail, a welded tread plate floor and foam decking on the coaming tops. It has elite bolster seats on top of Stabicrafts proprietary blade seat frames that allow for convenient stowing of cooler bins beneath. The transom is equipped with a very practical insulated central fish box with a sliding bait board and dual slide-away corner seats.

SPORTFISH

The Sportfish package showcases the most popular options typically selected on a 7m+ hard top. The package includes all the standard essentials already included in the Adventure package plus the additional comforts of a canvas rear wall to keep you warm and dry, V-berth extendable to full length, cabin lining, folding passenger seating and suspension seats at the helm. It sports a superbly appointed Superfish transom, including a lockable drawer, 2x leader spool holders, a top-mounted live bait tank and a sliding bait board. The Sportfish is finished in Stage-1 belting up gloss paint and is ready for a huge range of upgrade options.

PROFISH

This premier package suits the more discerning buyer looking for comfort and aesthetic features that enhance their time on the water. The Profish has all the included items of the Adventure and Sportfish but adds the most popular additional comforts. The sealed chambers are filled with closed cell foam for noise reduction, the floor is appointed with 6mm foam decking that is soft and insulates your feet. The finely upholstered passenger seat boxes convert to a secondary berth across the full cabin width, and additional ambient courtesy lights are tucked discretely into the coaming pockets. The stereo system is upgraded to a premium RA670 Fusion with 4x speakers. The bow rail and all handrails are powder coated to match the cabin, the Profish is finished in Stage 2 gloss paint which extends to the top of the hull.
