

STABICRAFT 2100 Frontier

Looking for the next level in centre console offshore fishing - the new 2100 Frontier is Stabicraft's answer to ensuring your next epic offshore adventure. Based off the highly capable 2100 Supercab hull and featuring many of the same innovations that have made this mid-size range so popular the 2100 Frontier embodies what a true centre console should be. With a 275L under floor fuel tank, unrivalled stability and the safety of our life ring, Positive Buoyancy™ design, you can rest assured your 2100 Frontier is virtually unsinkable. This new model also features Stabicraft's famous Arrow Pontoon™ design coupled with the Game Chaser Transom™ making the hull performance unrivalled in big blue water. Serious fisherman will appreciate the optional transom box and live bait tank as well as our largest centre console dash ready for the latest electronics around. Rod, tackle and gaff storage is taken care of by long, deep and tall gunnel pockets easily accessed when a big fish is alongside the boat. More can be found under the optional raised casting platform and inside the sealed centre console. This boat has been designed with what true open boat fishing is all about - maximising fishability, manoeuvrability and adventuring with confidence!
